**CONNECTING AGRICULTURE
PRODUCT GLOBALLY**

The background of the slide features a grayscale image of several hands of different skin tones reaching out and holding a globe. The hands are positioned around the globe, symbolizing global unity and collaboration. The globe is centered in the upper half of the image, and the hands are spread across the frame, creating a sense of shared responsibility and teamwork.

● Our Vision

"Together we Grow" encompasses our vision to become the preferred commodity trading organization by improving aspects of the business we operate in, promoting fair trade practices, and ensuring the growth of all involved parties. In doing so, we want to encourage co-ownership within the ecosystem, thus building shareholder value.

● Our Mission

Our Mission is to bridge the demand for high-quality agricultural products worldwide, starting with the UK, Europe, and South East Asia, followed by Africa & other countries.

● Our Strategy

After a decade & an annual average revenue has been growing regularly. We would like to sustain our current revenue and maximize our profitability. Our growth plans are driven by trading capacity in the various markets and the strategy to be integrated across the distribution supply chain - from origination to consumption. This enables control over each stage of business (commodity movement, transaction timing), creating significant cost efficiencies. We would like to ensure strong risk management practices and primarily focus on trade with selected and known counterparties, in familiar markets with proper contingency plans.

Our Strategy has 3 Pillars and is focused on Growth and Profitability

Increase Volume on Existing Commodities

- Gain benefits from scale
- Consolidate positions in higher margin trades
- Focus on growing networks & channel capabilities
- Prepare for organic organizational

Replicate Model to New Commodities & Markets

- Leverage existing channels to determine growth drivers
- Focus on building expertise in new commodities & markets
- Invest in growing the team

Building Brand Name and Reputation

- Invest in brand management
- Focus on vertical integration/capability adjacency
- Improve profitability

Products

Rice

We consider quality control to be important to our business and have implemented quality control measures at various stages of the production, packaging, and shipment processes. Our attention to rice quality is evident from the fact that our inspectors closely monitor the quality of rice at the time of packing and shipping. No effort is spared to ensure that the rice that is traded by us is of the best quality and is fully protected against all possible hazards during its journey before it reaches the buyer.

With our expertise in rice varieties and markets, we are able to offer the most competitive rates to our clients. We believe in long-term business relationships and deliver quality rice shipments to importers, distributors, millers, and pre-packers from every part of the world. Our business strength lies in our procurement and distribution channels in various parts of the world.
